SUBJECT: EXBS: ALBANIA MARITIME, ADRIATIC REGION REPORTING CABLE  
FOR MARCH 2008

**11. (U) BROAD ITEMS OF INTEREST TO ADVISORS AND AGENCY MANAGERS**

-- 15 March: Gerdec munitions site detonation: Significant reporting via cable and news media. Following embassy brief, MA called the USCG training team in Vlore regarding initial (and subsequent) opinions indicating accidental (vice malicious) causal factors while explosions were ongoing. As a result of political pressure resulting from the devastation, the Minister of Defense resigned. The Director of the Civil Emergency Department is designated as the clean-up coordinator.

**12. (U) COMPLETED ACTIONS FOR THE REPORTING PERIOD**

-- March 07-18: MA approved absence.

**13. (SBU) MEETINGS DURING REPORTING PERIOD**

-- March 20: EXBS Maritime Office coordinated a meeting with the Director of the Radiation Protection Office, Customs Deputy General Director and the Director of the Centre of Applied Nuclear Physics (a.k.a. Nuclear Physics Institute) at the University of Tirana. Discussions focused on coordination, status, location and required actions to get any portal monitors currently in Albania to fully functional condition. Customs Directorate provided a list that included portal monitors throughout the country, none of which is currently operable.

-- The Applied Nuclear Physics Institute (ANPI) leading Professor requested EXBS assistance with providing nuclear source materials suitable for testing and calibration activities for portal monitors (the activities they are responsible to perform). The sources ANPI currently have on hand are substantially stronger (more emissions/more dangerous to handle) than preferred test and calibration samples (which are comparatively low emitters). The requested sources serve as effective calibration measurement tools in nonproliferation actions. ANPI requested sample sources of:

[Am-241: (60 Energy/keV) (3-5 Activity, MBq)]

[Co-57 : (122, 136 Energy/keV) (3-5 Activity/MBq)]  
[Cs-137: (662 Energy/keV) (3-5 Activity/MBq)]  
[Co-60 : (1173, 1333 Energy/keV) ( 3-5 Activity/MBq)]  
[Ba-133: (31,356 Energy/keV) (3-5 Activity/MBq)]  
[Cf-252: neutron, 0.11 Activity/MBq - corresponding to 12,000 n/s]

The level of mechanical/technical familiarity at ANPI with each make and model portal monitor has not been confirmed.

**14. (U) TRAINING CONDUCTED DURING THE REPORTING PERIOD**

-- March 17-22: USCG Maritime Law Enforcement Instructor Training and Joint Maritime Law Enforcement Boarding Course at Naval Department training center in Vlore. The original schedule was adjusted due to the five ship NATO visit in Durres 01-05 March.

-- March 24-28: The CBP Cross Border Exercise for Macedonia, Albania and Greece will focus on the Kafasan (Macedonia)/Qafe Thana (Albania) area BCP's.

**15. (U) EQUIPMENT DELIVERED DURING THE REPORTING PERIOD**
